COMUNICAT

10.06.2011

In data de 8 iunie, 2011 a fost pus in functiune obiectivul : Conducta de aductiune apa potabila Gherla-Dej, primul contract finalizat in cadrul axei 1 din POS Mediu.

Contractul a avut o valoare de 16,46 milioane lei. Lucrarile au demarat in 20 Ianuarie 2009 si au constat in prelungirea cu 20 de km a aductiunii existente Gilau-Gherla pana in municipiul Dej.

Obiectivul contractului a fost asigurarea independentei si sigurantei alimentarii cu apa, cat si imbunatatirea suplimentara a calitatii apei pentru cei circa 40.000 de locuitori ai municipiului Dej si a localitatilor arondate, precum si a celor de pe traseul aductiunii, in conditiile in care pana in prezent municipiul Dej era deservit de o statie de tratare a unei firme private care preleva apa din Somesul Mare.

lei. Work started in January 20, 2009 and consisted of 20-km extension of the existing supply Gilau - Gherla to the Dej city.

Contract objective was to ensure independence and reliability of water supply, and further improve water quality for the roughly 40,000 residents of the city of Dej and surrounding villages, as well as those on the supply route, given that until now the Dej city was served by a treatment plant from a private company which took water from Somes Mare.
