Aim of the Conference

Water Loss Europe 2012 is intended to present and discuss the latest developments, strategies, techniques and applications of international best practices in **Non-Revenue Water Management**.

The Conference is the first regional event following a series of successful IWA water loss reduction speciality conferences, like "Water Loss 2010" that was held in Sao Paulo, Brazil in June 2010 with 630 participants from more than 30 different countries from around the world.

Water Loss Europe 2012 was brought to Europe to address the pressing need for improved water utility efficiency in this part of the world.
